

The team is available for any professional who wishes to make contact regarding a young person under 18 giving cause for concern and about whom there are questions regarding his/her mental health or neurodevelopmental difficulties including learning disability and autism, who:

- present high risk of harm towards others and about whom there is major family or professional concern,
- and/or are in contact with the youth justice system,
- OR about whom advice about the suitability of an appropriate secure setting is being sought because of the complexity of presentation and severe, recurrent self-harm and or challenging behaviour which cannot be managed elsewhere.

We accept referrals for young people living in the north central and north east London boroughs, however young people who currently live out of area may also be referred.
