Subject

Gender Identity Development Service Statistics

Details of enquiry

I am writing a seminar presentation about Transgender Children and their families and would like to include statistics on the number of cases the clinic has seen over the last few years.

I have read/seen that the cases have increased significantly recently but do not have reference information to support this.

I am hoping you could send me the statistics or/ and a reference support that the cases doubled in 2016 compared with 2015 (if that is what they read, I could be remembering incorrectly).

I was looking around the website for such statistics (and could have missed them) but have not been able to find any.
