Explanatory notes for reading this dataset:

- a. Age at referral are in financial years.
- b. Includes England referrals only.
- c. Includes referrals which are not accepted.
- d. Was generated on 25 June 2019 from CareNotes.
- e. We have combined the ages 3 and 4 to avoid publishing numbers equal to or under 5, which in some cases might identify or single out patients.
- f. All non-age values of 5 or less are suppressed and represented as <5 to prevent any possible identification of individuals.
- g. We note that we cannot provide reliable information from before 2012 due to multiple system changes.
- h. We update records as we acquire appropriate data on gender assigned at birth, so incomplete data may change in future reporting.
