Subject

Electronic Patient Records

Details of enquiry

We are interested to understand the IT applications that Tavistock and Portman NHS Foundation Trust are using to manage the clinical records of patients across all departments and specialities listed below. Our request is limited to systems holding patient clinical records as an electronic health record (EHR), and excludes systems such as Patient Administration Systems (PAS), Portals, and other back office corporate systems that are not used by clinicians to handle patient clinical records..

I anticipate that this list of IT applications should be available as part of the Trust's compliance with GDPR.

For each system, please list both the system name and the manufacturer or vendor. Where there is an in-house IT application, please provide contact details for the person responsible for this application.

Clinical oncology
Clinical radiology
Community sexual and reproductive health
Dentistry - Community Dentistry
Dentistry - General Dentistry
